Titel	Deploying, Configuring and Administering a Microsoft Lync Server 2010
Untertitel	Einführung in die VoIP-Telefonzentrale von Microsoft
Einleitung	<p>Microsoft Lync 2010 bietet einen einfachen und attraktiven Zugriff auf diverse Kommunikationstools über eine einzige vereinfachte Schnittstelle. Benutzer können von beliebigen Standorten mit einer Internetverbindung mit anderen in Verbindung bleiben und zusammenarbeiten. Dieser ZFI/Microsoft-Kurs zeigt IT-Profis, wie eine Lync-Server-2010-Lösung effizient und richtig erstellt, konfiguriert und betrieben wird. Das Schwergewicht des Kurses liegt dabei auf den Enterprise Voice Features, also auf der Telefonie. Der Kurs wird durch einen erfahrenen Lync-Spezialisten geleitet. Viele praktische Demos und Übungen begleiten den Kurs. Der Kurs bereitet auf das Examen 70-664 vor und somit auf die Zertifizierung zum MCTS Microsoft Lync Server 2010, Configuring.</p>
Ihr Nutzen	<p>After completing this course, students will be able to:</p> <ul style="list-style-type: none">- Describe how the features and architecture of Microsoft Lync Server 2010 enable real time communication and collaboration- Deploy Lync Server 2010- Configure users and rights using Role Based Access Control (RBAC)- Deploy and manage Lync 2010 clients- Configure and manage external user access using the Edge server role- Deploy basic Enterprise Voice functionality- Extend Enterprise Voice functionality to include Trunk options, call park orbit, and the unassigned number feature- Integrate Microsoft Exchange Server 2010 Service Pack 1 (SP1) Unified Messaging (UM) with Lync Server 2010- Configure the Response Group Service, including agent groups, queues, and workflows- Configure and manage conferencing- Configure and use archiving and monitoring- Perform back up and restore of Lync Server 2010 critical data- Improve bandwidth management using Call Admission Control (CAC)- Configure and deploy Enhanced 9-1-1- Configure a Survivable Branch Server for a branch office
Voraussetzungen	<p>In addition to their professional experience, students who attend this training should have an understanding of the following telecommunications concepts:</p> <ul style="list-style-type: none">- The difference between TDM and VoIP- Gateways and PBX- Session Initiation Protocol (SIP)- Codecs- Dialing plans <p>Students should also understand the following general concepts:</p> <ul style="list-style-type: none">- Networking fundamentals, including TCP/IP/UDP, DNS- Active Directory principles and management- Windows Server 2008 fundamentals- Public Key Infrastructure (PKI)- Exchange Messaging concepts- PowerShell basics- SQL Server concepts and operation

Teilnehmerkreis	This course is intended for IT professionals and telecommunications professionals who want to learn how to install, configure, manage and maintain a Microsoft Lync Server 2010 environment. These professionals should have at least 3 years? experience working with unified communications software, including knowledge of and experience with Microsoft Office Communications Server 2007 R2.
