|------------------------|--|
| Titel | Upgrade auf .NET Framework 4.0 |
| Untertitel | ein Überblick über die neuen Features |
| Einleitung | <p>The Microsoft .NET Framework 4 provides the following new features and improvements: The .NET Framework 4 works side by side with the Framework version 3.5 SP1. Applications that are based on earlier versions of the Framework will continue to run on that version. Just a subset of functionality is shared by all versions of the Framework. Innovations in the Visual Basic and C# languages, for example statement lambdas, implicit line continuations, dynamic dispatch, and named/optional parameters. The ADO.NET Entity Framework, which simplifies how developers program against relational databases by raising the level of abstraction, has many new features. These includes persistence ignorance and POCO support, lazy loading, test-driven development support, functions in model, and new LINQ operators. Enhancements to ASP.NET: New JavaScript UI Templates and databinding capabilities for AJAX. New ASP.NET chart control. Improvements in WPF: Added support in Windows Presentation Foundation (WPF) for Windows 7 multi-touch, ribbon controls, and taskbar extensibility features. Added support in WPF for Surface 2.0 SDK. New line-of-business controls including charting control, smart edit, data grid, and others that improve the experience for developers who build data centric applications. Improvements in performance and scalability. Visual improvements in text clarity, layout pixel snapping, localization, and interoperability. Improvements to Windows Workflow (WF) that let developers to better host and interact with workflows. These include an improved activity programming model, an improved designer experience, a new flowchart modeling style, an expanded activity palette, workflow-rules integration, and new message correlation features. The .NET Framework also offers significant performance gains for WF-based workflows. Improvements to Windows Communication Foundation (WCF) such as support for WCF Workflow Services enabling workflow programs with messaging activities, correlation support, durable two-way communication and rich hosting capabilities. Additionally, .NET Framework 4 provides new WCF features such as service discovery, router service, simplified configuration and a number of improvements to queuing, REST support, diagnostics, and performance. Innovative new parallel programming features such as parallel loop support, Task Parallel Library (TPL), Parallel LINQ (PLINQ), and coordination data structures which let developers harness the power of multi-core processors.</p> |
| Ihr Nutzen | <p>Die Teilnehmenden gewinnen eine solide, praxisorientierte Einführung über die aktuelle .NET-Technologie und werden befähigt, die .NET Framework 4.0 Features in ihrer eigenen Projektarbeit einzusetzen.</p> |
| Voraussetzungen | <p>Besuchte .NET-Framework Fortgeschrittenen-Kurse aus dem ZFI-Curriculum: Kurscodes NCWI, NCWE, NADX oder äquivalente Kenntnisse. .NET-Entwicklungs-Erfahrung. Sicherer Umgang mit Visual Studio 2005 und/oder 2008. Achtung: Dies ist kein Kurs für .NET-Einsteiger!</p> |
| Teilnehmerkreis | <p>Das Seminar eignet sich für erfahrene .NET-Software-Entwickler, welche das .NET Framework 4.0 einsetzen möchten.</p> |

Unterlagen
Folgekurse
Inhalt

- What's New in the .NET Framework Version 4
 - Application Compatibility and Deployment
 - Parallel Computing
 - Improved Security Model
 - Core New Features and Improvements
 - Networking
 - Web
 - Client
 - Data
 - Communications and Workflow
-
- What's New in Windows Workflow Foundation
 - Workflow Activity Model
 - Richer Composite Activity Options
 - Expanded Built-In Activity Library
 - Richer Activity Data Model
 - Enhanced Hosting Options
 - Easier Ability to Extend WF Designer Experience
-
- What's New in Windows Communication Foundation 4.0
 - Controlling Service Activation Based on Available Memory
 - Support for WS-Discovery
 - Standard Endpoints
 - Workflow Services
 - Target Framework Moniker

Beitrag

Der Teilnehmerbeitrag versteht sich rein netto. Das ZFI ist (gemäss MwSt-Gesetz) nicht Mehrwertsteuerpflichtig und erhebt somit keine MwSt. Bei länger als einen Monat dauernden Lehrgängen ist die Zahlung des Teilnehmerbeitrages in mehreren Raten möglich (pro rata temporis).

Bildungsweg Visual Studio .NET
